What Does Protocol 6 of the Protocols of the Learned Elders of Zion Reveal About the Illuminati's Take-Over Technique?

Sixbert SANGWA • July 18, 2024

The Protocols of the Learned Elders of Zion outline a sinister plan for economic and political domination by a secret group often linked to the Illuminati. This document, consisting of 24 protocols, describes strategies to control global wealth and manipulate social structures, leading to a society ripe for the rise of the Antichrist. In this brief article, we will explore the key elements of Protocol 6, "*Take-Over Technique*," demonstrating how these provisions have influenced geopolitical developments throughout history and their status in today's world.

Establishment of Monopolies and Economic Control

The protocol 6 begins with a plan for establishing huge monopolies to amass colossal riches, making even large fortunes dependent on these monopolies. The authors states: *"We shall soon begin to establish huge monopolies, reservoirs of colossal riches, upon which even large fortunes of the GOYIM will depend..."* The intent is to ensure that the economic stability of nations and individuals collapses alongside the monopolies when political turmoil ensues.
This strategy has been evident in the formation of multinational corporations that wield immense influence over global markets and economies, often rumored to be controlled by secretive groups like the Illuminati.
Throughout history, powerful monopolies have arisen to dominate entire industries. The Rockefeller family's Standard Oil Company in the late 19th and early 20th centuries is a prime example, controlling nearly 90% of the U.S. oil industry and significantly influencing economic and political spheres. Today, multinational corporations such as Amazon, Google, and Facebook exhibit similar monopolistic traits. Their vast influence over global markets and economies means that many smaller companies and even large fortunes depend on these tech giants. The collapse of any of these corporations would have catastrophic effects on the global economy, demonstrating the dependency described in this provision and suggesting a web of control that aligns with the Illuminati's purported objectives.

Significance of a Super-Government

The protocol 6 continues with another sinister plan for the development of a Super-Government, portrayed as the Protector and Benefactor for those who submit to it. It states: *"In every possible way we must develop the significance of our Super-Government by representing it as the Protector and Benefactor of all those who voluntarily submit to us."*
The idea of a Super-Government has been pursued through the establishment of international bodies like the League of Nations and later the United Nations (UN). These organizations were created to foster global cooperation and peace but have often been criticized for overreach and influence over national sovereignty. The UN, in particular, is seen as a pilot project for a one-world government (control under the Antichrist as per Revelation 13:16), holding significant sway over national policies. Today, the UN, the European Union (EU), and other supranational organizations play significant roles in global governance. These entities often position themselves as protectors of human rights and global peace, fitting the description of a Super-Government.

Depriving Aristocrats of Land and Resources

The protocol emphasizes depriving the aristocracy of their land by increasing the financial burdens on landed property, leading to a state of submission. This provision reads as *"It is essential therefore for us at whatever cost to deprive them of their land. This object will be best attained by increasing the burdens upon landed property - in loading lands with debts."*
Historically, land reforms and policies have undermined traditional landholders, shifting wealth and control away from the aristocracy. For example, the Russian Revolution led to the confiscation of aristocratic lands and their redistribution to the proletariat. In many countries, land reforms and taxation policies have targeted the aristocracy, redistributing land and wealth. Additionally, in some nations, land is owned by the state, and citizens pay perpetual leases to their government. Modern examples include progressive taxation, inheritance taxes, and land reforms aimed at reducing wealth inequality. These measures continue to erode traditional landholdings and transfer control to the state or corporations. This shift is often not thought of but in reality, land is under control of powerful entities, tightening their grip on global resources. The Bible condemns such unjust treatment of those who are vulnerable, highlighting the moral implications of dispossessing landowners (Proverbs 22:22).

Patronizing Trade, Industry, and Speculation

Intensive support for trade, industry, and especially speculation was planned to divert labor and capital from the land, concentrating wealth in the hands of the controllers. Their plan stated: *"At the same time, we must intensively support trade and industry, but, first and foremost, speculation, whose role is to provide a counterbalance to industry..."*
This has been orchestrated through the rise of speculative markets and financial instruments, which the secretive group manipulates to destabilize economies and increase wealth inequality for their benefit. During the Industrial Revolution, they shifted labor and capital from agriculture to industry, consolidating control over new economic sectors. The stock market crash of 1929 and the subsequent Great Depression illustrated the dangers of their speculation-driven economies. Today, the global financial system heavily relies on speculation, dominated by hedge funds, derivatives, and complex financial instruments. These markets are often manipulated to create economic instability that benefits the group. The 2008 financial crisis is a recent example of the catastrophic effects of unchecked speculation orchestrated for the group's advantage.

Manipulating Wages and Prices

Raising wages while simultaneously increasing the cost of essential goods is suggested as a method to maintain control. According to Protocol 6, the group's plan was: *"We shall raise the rate of wages, which, however, will not bring any advantage to the workers, for, at the same time, we shall produce a rise in prices of the first necessaries of life..."*
This tactic creates an illusion of benefit to workers while effectively reducing their purchasing power. Modern examples include inflation and cost-of-living adjustments that fail to keep up with real expenses. Inflation and wage manipulation have been used to control economies. During the 1970s, many Western countries experienced stagflation, where rising wages did not keep pace with increasing prices, eroding workers' purchasing power. Currently, many workers face similar issues. While wages have increased in some sectors, the cost of living has often risen faster, nullifying the benefits of higher pay. This creates economic strain and maintains control over the working class. This aligns with the third seal of Revelation 6:6, which depicts economic hardship and scarcity, symbolized by a black horse. The Bible warns: "*You shall not oppress a hired servant who is poor and needy*" (Deuteronomy 24:14). Woe to those who offer unfair treatment to workers, as this counters the exploitative measures described.

Masking True Intentions

Lastly, the secretive group planned that true intentions of these actions are to be masked under the guise of serving the working classes and promoting political economy principles. They state: *"****In order that the true meaning of things may not strike the 'GOYIM' before the proper time we shall mask it under an alleged ardent desire to serve the working classes and the great principles of political economy..."* This deception is evident in political rhetoric that promises economic improvement while enacting policies that benefit the elite.
Political rhetoric has often concealed true intentions. Populist movements and socialist rhetoric in the early 20th century promised benefits to the working class while consolidating power among elites. The Bolshevik Revolution, for instance, promised equality but resulted in authoritarian rule. Modern politicians frequently employ similar tactics. Policies purportedly designed to aid the working class often benefit corporations and the wealthy instead. This deception maintains public support while advancing hidden agendas. Scripture warns of those who disguise their true motives under a veneer of righteousness: *"For such are false apostles, deceitful workers, transforming themselves into apostles of Christ"* (2 Corinthians 11:13)

Concluding Thoughts

The strategies outlined in Protocol 6 have undeniably shaped global geopolitics. From the establishment of powerful corporations to the creation of supranational entities like the United Nations and the European Union, the influence of these principles is evident. The manipulation of economic systems, control of resources, and the erosion of traditional power structures align with the objectives described in this protocol. Today, we witness the convergence of these strategies as economic inequalities widen, political powers centralize, and global crises necessitate unified responses. These trends point towards a world increasingly susceptible to the rise of a single authoritative figure, as foretold in the Bible's depiction of the Antichrist.
By examining Protocol 6 of the Protocols of the Learned Elders of Zion, we uncover a blueprint for global domination that has influenced historical and contemporary events. As Christians, it is crucial to remain vigilant and discerning, grounded in Scripture, and aware of the spiritual battle at play. Through faith and understanding, we can navigate these challenges, standing firm in the truth of God's Word.
